Sample Advanced Accounting Test Questions and Model Answers

Below are example questions with detailed answers to illustrate the approach and depth required in advanced accounting tests.

Question 1: Consolidation of a Parent and Subsidiary

Scenario: Company A owns 80% of Company B. At the acquisition date, Company B's net asset value was \$1,000,000, and the purchase price was \$1,200,000. Goodwill is to be recognized, and the fair value adjustments are to be considered.

Required: Prepare the consolidation journal entries at the acquisition date.

Model Answer:

Calculate the fair value of identifiable net assets:
 Net book value = \$1,000,000
 Assume no additional fair value adjustments for simplicity.

Determine goodwill:
 Purchase consideration = \$1,200,000
 Less: 80% of net assets = $0.8 \times \$1,000,000 = \$800,000$
 Goodwill = $\$1,200,000 - \$800,000 = \$400,000$

Consolidation journal entries:

```
Dr. Identifiable net assets (to
```

eliminate) \$800,000Dr. Goodwill \$400,000Cr. Investment in Company B \$1,200,000````Additional considerations: If fair value adjustments exist, they should be incorporated into the net assets before calculating goodwill. Any intercompany transactions and unrealized profits must be eliminated during consolidation.

Question 2: Accounting for a Business Combination under IFRS 3

Scenario: Company X acquires 100% of Company Y for \$5 million. The fair value of Y's identifiable net assets is \$3.5 million. During the acquisition, certain intangible assets are recognized, and goodwill is calculated.

Required: Determine the amount of goodwill and outline the journal entries to record the acquisition.

Model Answer: Calculate goodwill: Purchase consideration = \$5,000,000 Fair value of net assets = \$3,500,000 Goodwill = \$5,000,000 - \$3,500,000 = \$1,500,000

Journal entries: ````plaintext

Dr. Identifiable net assets	\$3,500,000	Dr. Goodwill	\$1,500,000	Cr. Cash (or other consideration paid)	\$5,000,000
-----------------------------	-------------	--------------	-------------	--	-------------

````Additional notes: Recognize intangible assets separately if they meet recognition criteria. Adjustments for deferred tax, contingent liabilities, or other fair value modifications should be included if relevant.

Question 3: Foreign Currency Translation

Scenario: A company based in Europe has a subsidiary in the US. The subsidiary's functional currency is USD. The financial statements are prepared in USD, but the parent reports in EUR. The following data is provided:

Current USD exchange rate: 1 USD = 0.85 EUR

Historical rate at acquisition: 1 USD = 0.80 EUR

The subsidiary's net income for the year: \$200,000

Dividends paid during the year: \$50,000

Required: Calculate the translated amounts to be included in the consolidated financial statements.

Model Answer: Translate assets and liabilities at the closing rate (current rate): Not required here as no balance sheet data provided.

Translate income statement items: Income:  $\$200,000 \times 0.85 = ?170,000$

Translate dividends: Dividends paid:  $\$50,000 \times 0.85 = ?42,500$

Translate equity at historical rate: Not specified, but if needed, use the historical rate (0.80 EUR).

Impact on translation: The translation difference arises from the change in exchange rates for net assets, income, and dividends. The translation adjustment is recognized in other comprehensive income.

Advanced Accounting Standards and Best Practices

To produce accurate and compliant test answers, familiarity with relevant standards is crucial:

- IFRS 3 (Business Combinations): Guides the recognition and measurement of goodwill and intangible assets.
- IAS 27 / IFRS 10 (Consolidated Financial Statements): Provides standards for group accounting and control assessment.
- IAS 21 (The Effects of Changes in Foreign Exchange Rates): Outlines translation methods and accounting for foreign currency transactions.
- IAS 28 (Investments in Associates): Covers the equity method of accounting for associates.
- IFRS 9 (Financial Instruments): Establishes principles for classification, measurement, and impairment of financial assets and liabilities.
